Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The PTOL 1449 has been received, reviewed and considered.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The abstract of the disclosure is objected to because it is not in the form of one paragraph. Correction is required. See MPEP § 608.01(b).
4. The disclosure is objected to because of the following informalities: It does not contain the continuing data. In the specification, page 1, line 1, please insert the following:

--This application is a371 of PCT/WP04/04383 04/23/2004 which claims benefit of 60/466,389 04/29/2003 and claims benefit of 60/486,473 07/11/2003--.

Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-14 are allowed.

6. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

7. The following is an examiner's statement of reasons for allowance: The most relevant prior art of reference is the article entitled "The Antisolvent Crystallization of Sodium Chloride" as cited by the applicants. However, it does not teach nor fairly suggest singularly or in any combination thereof a process involving the use of an antisolvent comprising the steps of feeding water to an inorganic salt source to form an aqueous solution comprising said salt, feeding said aqueous solution to a crystallizer/settler, contacting said aqueous solution with one or more antisolvents which force the salt to at least partly crystallize, with at least one of said antisolvents exhibiting crystal growth inhibiting properties and/or scaling inhibiting properties, and where if the antisolvents do not exhibit sufficient crystal growth inhibiting properties and/or sufficient scaling inhibiting properties, one or more crystal growth inhibitors are added to the antisolvents and/or to the aqueous solution, and/or one or more scaling inhibitors are added to the antisolvents and/or to the aqueous solution, feeding an overflow of the crystallizer/settler comprising one or more antisolvents and an aqueous salt solution to a nanofiltration unit comprising a membrane to separate the one or more antisolvents from the aqueous salt solution, removing the crystallized salt from the crystallizer/settler in an aqueous slurry, optionally, recycling the one or more antisolvents to the crystallizer

/settler, and optionally, recycling water from the slurry to the first dissolution step and/or to the crystallizer/setter

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
